

## Worlds UNBound Girls Club 2023 Registration

The Girls UNBound Club promotes activities designed to dismantle stereotypes around the STEM (Science, Technology, Engineering & Math) fields and create a fun and inviting atmosphere for girls (including all students who identify as female) in grades 3 through 8 to learn about science and engineering! This session of Girls Clubs, consisting of six sessions, will focus on developing digital skills. Our goal is to move youth away from being passive consumers of technology to active producers of technology. These sessions are facilitated by current science, engineering, and computer science students at the University of New Brunswick. Best of all, these sessions are FREE of charge to all participants!
